Graham Greenleaf

Professor of Law & Information Systems, University of New South Wales

- The first work to analyse data privacy laws across Asia
- Written by one of the leading authorities in Asian Data Privacy
- Offers an in-depth analysis of data privacy laws in a number of Asian countries, including India, Japan, and Singapore

The first work to examine data privacy laws across Asia with an in-depth analysis of data privacy authorities and their powers in 14 Asian countries. Professor Greenleaf illustrates the increasing world-wide significance of data privacy and the international context of the development of national data privacy laws as well as assessing the laws and their enforcement against international standards.

The specifications in this leaflet/catalogue, including without limitation price, format, extent, number of illustrations, and month of publication, were as accurate as possible at the time it went to press.

‘Asia Data Privacy Laws is the first ground-breaking work to examine data privacy laws and data protection authorities across Asia. ... This comprehensive and authoritative book, written with verve and vigour, should prove to be a rich source of knowledge of privacy laws and practices in Asia for regulators, lawyers, privacy professionals, and academics within and outside the region.’

- **Allan Chiang**, Privacy Commissioner for Personal Data, Hong Kong

‘Rich in legal and political detail, and comprehensive in scope, Graham Greenleaf’s new book is an important reminder of the global reach of contemporary data privacy law. It stands as a model for the comparative analysis of data protection policy, not only in Asia, but elsewhere as well.’

- **Professor Colin J. Bennett**, University of Victoria, Co-author of *The Governance of Privacy*

‘Graham Greenleaf has thought more and more deeply about data protection and privacy laws in Asia than most scholars or practitioners. This masterful volume offers detailed studies of the key jurisdictions as well as thoughtful – and thought-provoking – analysis of regional trends and possible futures.’

- **Prof. Simon Chesterman**, Dean of the National University of Singapore, Faculty of Law

‘This volume will help everyone who processes personal data anywhere in Asia to understand the obligations that accompany the processing. Everyone outside of Asia who does business with Asian consumers – or who advises those who do – needs this book.’

- **Robert Gellman**, former Chief Counsel to the Government Information Subcommittee, USA House of Representatives

‘A remarkable work of privacy law and comparative law scholarship, and both gives much detailed and useful information on the specifics of national laws in Asian countries, and provides a high-level analysis of the trends that they evidence. It will be a mandatory part of the bookshelf of anyone interested in the global aspects of data protection.’

- **Christopher Kuner**, Editor-in-chief, International Data Privacy Law

Table of Contents
